	URGENT	**NOT URGENT**
IMPORTANT	- Decide on how to display it - Plan and build the simple interface - Make a working version of connect four	- Expand into other games - Make a more polished interface - Add levels of customization/some data storage.
NOT IMPORTANT	- Which perks would be good to add - What visuals I could implement - How to refine the final look	- Dice system - Adding long, info heavy games - Adding a single player version (vs the program)
